

Chassis shipped from England 26th January 1959

Purchased by me in 2002 and registered August 2012

“Madge”

1959 Land Rover Series II SWB 88” Basic

“Madge” is an ex Australian Army Command Reconnaissance vehicle from the second contract dated 01/1959 with Australian Army registration number 110-574. She was a CKD unit and her chassis was dispatched from the Land Rover factory in Solihull, England on 26th February 1959 and delivered to Pressed Metal Corp in Sydney. Originally painted Deep Bronze Green (I much prefer the look of camouflage green so painted her in the later colour). I believe I am the third owner of the vehicle. Extras include Smith's heater, Rocky Mountain door tops and parabolic springs, Icom 440n UHF radio and a Toro overdrive. The tilt is from All Wheel Trim.
